AWHONN Strengthens Position Statement on Health Care Decision Making for Reproductive Care

EDITORIAL

473 Avoiding Potential Pitfalls in Qualitative Research Methods

The Associate Editor provides strategies for authors to use when they prepare reports of qualitative studies.

Cheryl Tatano Beck

REVIEWS

477 Systematic Review of Health Promotion Frameworks Focused on Health in the Postpartum Period

The authors review the scope and development of three frameworks to promote health in the postpartum period.

Lorraine O. Walker, Sookja Kang, and Kayla D. Longoria

491 Systematic Review of Self-Report Measures of Maternal Self-Efficacy

A variety of instruments with which to assess maternal self-efficacy among mothers of infants exist, and most were developed in Western cultures/countries.

Atchareya Jiramanee, Martha Driessnack, and Ellen Tilden

502 Scoping Review of the Relationship Between Gestational Diabetes Mellitus and the Neonatal and Infant Gut Microbiome

Neonates and infants born to women with gestational diabetes mellitus demonstrated altered gut microbiome composition; the mechanisms and long-term health implications of these alterations remain unclear.

Rebecca Koerner, Maureen Groer, and Stephanie Prescott

RESEARCH

517 Relationship Between Maternal COVID-19 Infection and In-Hospital Exclusive Breastfeeding for Term Newborns

The use of pasteurized donor human milk for breastfeeding supplementation of term newborns may protect the odds of in-hospital exclusive breastfeeding despite maternal COVID-19 infection.

Jessica Gomez, Diane Wardell, Stanley Cron, and Nancy Hurst

526 Vitamin D Deficiency During the First Trimester of Pregnancy and the Risk of Developing Gestational Diabetes Mellitus

Pregnant women with vitamin D deficiency may be at greater risk of developing gestational diabetes.

Nazlı Nur Aslan Çın, Mediha Yalçın, and Hülya Yardımcı

536 Alpha Test of the Donor Conception Tool to Empower Parental Telling and Talking

A mixed-methods approach was used to complete alpha testing, which resulted in refinement of the Donor Conception Tool to Empower Parental Telling and Talking prototype.

Patricia E. Hershberger, Agatha M. Gallo, Kirby Adlam, Alana D. Steffen, Martha Driessnack, Harold D. Grotevant, Susan C. Klock, Lauri Pasch, and Valerie Gruss

548 Mixed-Methods Study of the Experience of Pregnancy During the COVID-19 Pandemic

Initially, the COVID-19 pandemic presented challenges for pregnant participants, including increased anxiety and worry, but ultimately, feelings of anticipatory hope surfaced.

Jenna A. LoGiudice and Susan Bartos
