EDITORIALS

207 Newborn Screening Has Moved Way Beyond PKU

Nurses need to understand how clinical genetic and genomic applications affect newborn screening and advocate for parents and newborns.

Elizabeth Eisenhauer

213 Resilience in the Nurse Scientist

Resiliency skills support, promote, and augment the work of the nurse scientist.

Lynn Stover Nichols

COLUMNS

STATISTICS FOR NURSING RESEARCH

217 Working with a Statistician on a Data Analysis Plan

The author describes collaboration between a statistician and nurse or midwife scientist to develop a data analysis plan.

Oliwier Dziadkowiec

CURRENT EVIDENCE TO GUIDE PRACTICE, POLICY, AND RESEARCH

220 Reproductive health care for incarcerated women in the prenatal and postpartum periods

The author provides current evidence on reproductive health care for incarcerated women in the prenatal and postpartum periods.

Summer Sherburne Hawkins

REVIEW

234 Scoping Review of Fall Risk Assessment Tools for Women Who Receive Maternity Care

Fall risk assessment tools are used to assess women who receive maternity care; however, some of these tools are not validated in this specific population.

Sandra Risso, Tânia Soares, and Cristina Marques-Vieira

RESEARCH

245 Lived Experiences of Fatherhood After Infertility

The experiences during the perinatal period after infertility represent a unique journey for fathers, and they need support throughout the process.

Stephanie Morrison, Janet Bryanton, Christina Murray, and Vicki Foley

255 Midwives' Experiences of Intact Cord Resuscitation in Nonvigorous Neonates After Vaginal Birth in Sweden

Keeping the umbilical cord intact during resuscitation gives midwives the opportunity to keep the newborn close to the mother.

Katarina Patriksson, Ola Andersson, Filipa Stierna, Kristina Haglund, and Li Thies-Lagergren

264 Qualitative Study of Nurses' Experiences as They Learned to Provide Neonatal Palliative Care

Most participants learned neonatal palliative skills informally, and all believed they had insufficient education.

Julia St Louis, Shelley Raffin-Bouchal, Karen Benzies, and Shane Sinclair

272 Relationships Among Individual and Hospital Characteristics and Self-Efficacy in Labor Support Among Intrapartum Nurses in Texas

Self-efficacy in labor support was predicted by years of experience in intrapartum nursing and experience with the support of normal physiologic childbirth.

Lisette Saleh

285 Association of Peripartum Lactate Levels With Infection Outcomes

Lactate (>2.0 mmol/L) was associated with bacteremia and intraamniotic infection in the antepartum period and was a composite infection measure in all periods.

Marijo N. Aguilera, Sandra Hoffman, Whitney Wunderlich, David Watson, Marc Vacquier, and Abbey Sidebottom

Continued

296 **Early Experiences of Parents of Children With Craniofacial Microsomia**

Participants' narratives of their experiences of having children born with craniofacial microsomia can inform nurses about ways to improve early care.

Alexis L. Johns, Danielle McWilliams, Bruna Costa, Carrie L. Heike, Kristin Billaud Feragen, Matthew Hotton, Canice E. Crerand, Amelia F. Drake, Amy Schefer, Melissa Tumblin, and Nicola M. Stock

308 **Exploring the Meaning of Sexuality, the Body, and Identity After Birth Using Feminist Poststructuralism**

The meaning of the body and identity are intricately connected and significantly affect how sexual health is experienced by women during the first 6 months after birth.

Rachel Ollivier, Megan Aston, Sheri Price, Debbie Sheppard-LeMoine, and Audrey Steenbeek
