EDITORIALS

447 **Switzerland's Midwifery Model of Postpartum Care**

Switzerland's midwifery model of postpartum care is described and compared to postpartum care in the United States.

Joyce K. Edmonds and Vanessa Leutenegger

451 **Reconsidering Breastfeeding Recommendations in the Context of Cannabis Use to Support Health Equity**

The authors offer guidance to perinatal nurses and clinicians on how to assist patients who use cannabis and wish to breastfeed.

Stacey E. Iobst and Kara R. Skelton

COLUMNS

STATISTICS FOR NURSING RESEARCH

459 **Evaluation of Systematic Reviews and Meta-analyses**

The author describes various ways to assess the quality of systematic reviews, particularly meta-analyses.

Oliwier Dziadkowiec

CURRENT EVIDENCE TO GUIDE PRACTICE, POLICY, AND RESEARCH

464 **Approval of the First Nonprescription Oral Contraceptive Pill**

The author provides current evidence on the first nonprescription oral contraceptive pill.

Summer Sherburne Hawkins

BRIEF REPORTS

477 **Financial Toxicity in Relation to Childbirth**

Patients are at risk of worsened current financial toxicity after childbirth, regardless of their individual socioeconomic and medical conditions.

Annika Gompers, Elysia Larson, Katharine M. Esselen, Huma Farid, and Laura E. Dodge

485 **Intersecting Substance Use Disorder and Unmet Social Needs in Rural Pregnant Women**

Social needs among pregnant women with SUD augment barriers to treatment and should be addressed by integrated obstetric care and SUD treatment.

Sophia Allen, Alka Dev, Chelsey Canavan, and Daisy Goodman

RESEARCH

491 **Collaboration With Tribal Stakeholders to Explore Care for Postpartum Depression in the Chickasaw Nation**

Next steps for addressing postpartum depression in the Chickasaw Nation included raising awareness among providers, patients, and families

Jennifer L. Heck, Emily J. Jones, Judy Goforth Parker, Annika Jennings, Rebecca Pierce, and Sophia Mitra

503 **Relationships Among Mode of Birth, Onset of Labor, and Bishop Score**

In this study, vaginal birth was associated with spontaneous labor and Bishop score of 8 or greater for women with induction of labor.

Regina M. Winner, Jenny Graves, Kimberly Jarvis, Dee Beckman, Bradley B. Youkilis, Martha Monroe, and Claire C. Davies

511 **Resilient Infant Feeding Among Young Women With Histories of Maltreatment and Poor Support**

Findings indicated the need to support efforts to breastfeed among young women with histories of maltreatment through access to lactation support and trauma-informed care.

Amara Channell Doig, Michelle Jasczynski, Swati Sah, Francia Ximena Marin Gutierrez, Emily Hillig, Kayla Bae, Sara Garmchi, Katelyn Reynolds, Stefany Zelaya, and Elizabeth M. Aparicio

Continued

522 **Cluster Analysis of Fear of Childbirth, Anxiety, Depression, and Childbirth Self-Efficacy**

Participants with fear of childbirth were vulnerable to anxiety and depression, but self-efficacy mediated symptoms. Targeted treatments are needed based on severity of the conditions.

Ingegerd Hildingsson, Carita Nordin-Remberger, Michael B. Wells, and Margareta Johansson

534 **Parents' Shared Experiences of Separation From Their Newborns After Birth in Denmark**

The authors recommend minimizing family separation after childbirth and policies of zero separation because separation can hinder transition into parenthood and challenge family-centered care.

Anne Brødsgaard, Michella Bjerregaard, and Jannie Buhl Knudsen

543 **Qualitative Analysis of Women's Experiences of Education About POST-BIRTH Warning Signs**

Participants emphasized how postpartum discharge education significantly enhanced their comprehension and early detection of postbirth complications.

Carrie Morgan Eaton, Carol Lawrence, Eileen Magri, Jessica Irrobali, and Catherine Hill

554 **Relationship Between Frequency of Remote Visitation and Postpartum Depression in Mothers of Hospitalized Neonates During the COVID-19 Pandemic**

Frequency of remote visitation may be an important factor in identifying at-risk mothers who require social support.

Genichiro Sotodate, Sayaka Onodera, Ikue Okuyama, Manami Akasaka, Atsushi Matsumoto, Yukiko Toya, Nao Takashimizu, and Shigekuni Tsuchiya

562 **Women's Experiences of Mechanical Balloon Catheter Induction With Self-Traction**

Participants' positive experiences underscore the need for personalized services and position the use of a balloon catheter with self-traction as a valuable option during induction of labor.

Isabelle Landry, Roseline Galipeau, Amélie Gervaise, Valérie Bohémier, Diane Croteau, and Valérie Lebel

572 **Retrospective Observational Study of the Frequency and Interrelationships Among Neonatal Near Miss Criteria**

Different sets of identification criteria considerably altered the frequency of neonatal near misses and anticipated workload for neonatal near miss audits in high-income countries.

Poliana de Barros Medeiros, Kristen Haakons, Helen Liley, Christine Andrews, Adrienne Gordon, and Vicki Flenady
