## EDITORIALS

1 **Promoting Women's Mental Health Across the Life Course**

The guest editors for this series describe the importance of a life course perspective to women's mental health and introduce the articles in the issue.

*Shannon D. Simonovich, Kelly McGlothen-Bell, and Beverly Rossman*

5 **Racial Categorization in Women's Mental Health Research Fails to Meet the Needs of Multiracial, Biracial, and Mixed-Race Women in the United States**

The author challenges women's mental health researchers to critically examine the categories of race available for research participants, surveillance data, and medical records.

*Karen M. Tabb*

9 **Strategies to Improve Women's Mental Health Across the Life Course**

The authors describe four important strategies to improve women's mental health during the perinatal period and across the life course.

*Shannon D. Simonovich, Janna Stephens, Hsiang Huang, and Karen M. Tabb*

## REVIEWER ACKNOWLEDGMENT

13 **2024 JOGNN Reviewers**

## COLUMNS

### STATISTICS FOR NURSING RESEARCH

15 **Longitudinal Analysis in Maternal Mental Health Research**

The author describes a lifespan-based approach to understanding maternal depression and the statistical considerations essential for evaluating interventions.

*Oliwier Dziadkowiec*

### CURRENT EVIDENCE TO GUIDE PRACTICE, POLICY, AND RESEARCH

20 **Associations Between Menopause and Depression**

The author provides current evidence on the association between menopause and depression.

*Summer Sherburne Hawkins*

### BRIEF REPORT

32 **Feasibility and Acceptability of the We See You, Sis Sister Circle for Black Women With Depression Symptoms**

In this study, the We See You, Sis virtual sister circle was a feasible and acceptable mental health intervention for middle- and older-aged Black women with symptoms of depression.

*Kia Skrine Jeffers, Felica Jones, and O. Kenrik Duru*

### REVIEW

38 **Meta-ethnography of the Experiences of Women of Color Who Survived Severe Maternal Morbidity or Birth Complications**

The experiences of women of color who survived severe maternal morbidity or complications during pregnancy and/or childbirth suggest shortcomings in maternal health care delivery and offer opportunities for improvement.

*Cristina Chandra Mills, Eileen M. Condon, and Cheryl Tatano Beck*

### RESEARCH

50 **Perceptions of Women in Opioid Recovery Regarding Policies and Laws on Sexual and Reproductive Health**

Policy and law affect family planning experiences and access to substance use treatment for women in recovery from opioid use disorder.

*Jessica L. Zemlak, Aleigha Barry, and Nicole Mattson*

Continued

- 60 **Associations Among Lifetime Discrimination Typologies and Psychological Health in Black and Hispanic Women After Birth**

Participants who experienced moderate to high discrimination across all or specific life domains had greater postpartum depression and perceived stress scores at 6 months after birth.

*Jihye Kim Scroggins, Maxim Topaz, Se Hee Min, and Veronica Barcelona*

- 88 **Relationships Among Endorsement of the Superwoman Schema and Health Outcomes**

Findings offer insight into the psychological and social processes that affect Black women and the development of culturally competent intervention programs to address chronic disease.

*Alescia M. Farr, Jocelyn Smith Carter, and Kashica J. Webber-Ritchey*

- 102 **Mental Health Experiences of Muslim American Women During the Perinatal Period**

The maternity care team should be educated on the perinatal support needs of the growing Muslim American community in the United States to optimize clinical outcomes and improve patient experience of care.

*Miriam Kanan, Nadia Quad, Xavier R. Ramirez, Nahida Nayaz Ahmed, Hsiang Huang, Karen M. Tabb, and Shannon D. Simonovich*

- 112 **Secondary Qualitative Analysis of Stigmatizing and Nonstigmatizing Language Used in Hospital Birth Settings**

We extend previous work studying stigmatizing language in clinical notes from birth settings to include new stigmatizing and nonstigmatizing language categories.

*Veronica Barcelona, Jihye K. Scroggins, Danielle Scharp, Sarah E. Harkins, Dena Goffman, Janice Aubey, and Maxim Topaz*

## CASE REPORT

- 123 **Case Report of Dysphoric Milk Ejection Reflex**

A greater understanding of the characteristic symptoms of dysphoric milk ejection reflex and management strategies is important for health care professionals who support breastfeeding.

*Denise McGuinness and Timothy Frawley*
