## EDITORIALS

- 131 **Call to Action to Quantify Non-Severe and Severe Maternal Morbidity**

To effectively address the serious issue of maternal mortality, it is crucial to establish an accurate and encompassing framework for identifying and preventing severe maternal morbidity.

*Caitlin Dreisbach, Yang Yu, and Susan Groth*

- 137 **Evidence-Based Education Programs to Improve Maternal Outcomes**

The author describes and compares current education offerings to improve the quality of maternity care.

*Susan Hale*

## COLUMNS

### INTERPRETATIONS OF CURRENT MATERNAL AND NEONATAL RESEARCH TRIALS

- 146 **Ventilatory Assistance Before Umbilical Cord Clamping in Extremely Preterm Infants: A Randomized Clinical Trial**

The authors of the featured article conducted a randomized clinical trial to determine if ventilation and umbilical cord clamping reduced rates of intraventricular hemorrhage and early death in extremely preterm infants.

*Ellise D. Adams*

### CURRENT EVIDENCE TO GUIDE PRACTICE, POLICY, AND RESEARCH

- 151 **Barriers to Diagnosis and Innovations in Care for Endometriosis**

The author provides current evidence on endometriosis and barriers to diagnosis and innovations in care.

*Summer Sherburne Hawkins*

## BRIEF REPORT

- 164 **Integration of Peer Navigators Into Longitudinal Research**

The positive effects of incorporating peer navigators into a longitudinal research study with a high-risk population are highlighted.

*Carla M. Bann, Jamie E. Newman, Leslie Clarke, Sandra Russell, Megan Dhawan, Traci Beiersdorfer, Sara DeMauro, Deanne Wilson-Costello, Myriam Peralta-Carcelen, and Stephanie Merhar*

## CRITICAL COMMENTARY

- 170 **Elective Induction of Labor May Have Negative Effects at the Hospital Level**

By placing greater demands on labor and delivery units, elective induction of labor may reduce the availability of intrapartum care for women and neonates.

*Sean Mann and Kortney Floyd James*

## REVIEW

- 176 **Scoping Review of Women's Experiences of Breastfeeding Associated With Maternity Care in Hospitals That Implement Baby-Friendly Policies**

Women's breastfeeding experiences are affected by various factors, including the promotion of breastfeeding through the Baby-Friendly Hospital Initiative and intrapersonal considerations.

*Keri Durocher, Kimberley T. Jackson, Richard Booth, Panagiota Tryphonopoulos, and Kelly A. Kennedy*

## RESEARCH

- 189 **Breast Milk Feeding for Infants Who Required Major Surgery**

Key factors that motivated participants to provide mother's own milk for 6 months were valuing the nutritional benefits of breast milk, strong family support, and coping with barriers.

*Mary Ann D'Ambrosio and Madalynn Neu*

*Continued*

201 **Heel Warming in Very-Low-Birth-Weight Newborns for Capillary Blood Sampling**

Not warming versus warming the heel before a heel stick in preterm newborns were comparable in terms of procedure time, reliability of the blood sample, and newborn comfort.

Joke Maria Wielenga, April Pascual, Kiki Ruhe, and Christ Jan van Ganzewinkel

210 **Nurse Perceptions of Barriers to Infection Prevention and Control in Labor and Delivery**

Participants described barriers they experienced to implementing infection prevention and control practices in the labor and delivery setting.

Laura E. Anderson, Katelyn A. White, Ronda L. Cochran, and Kiran M. Perkins

219 **Expectations and Perspectives About Infant Feeding of Their First Child Among Rural Women**

Without basic knowledge of breastfeeding and lacking breastfeeding resources, rural women are likely to discontinue breastfeeding soon after giving birth.

Karry Weston, Allison Brandt Anbari, Tina Bloom, Kevin Everett, and Linda Bullock

229 **Qualitative Study of Experiences with an Interprofessional Perinatal Care Team Among Women Who Used Substances During the Perinatal Period**

Trauma informed approaches and dignified, culturally competent care are critical for women who used substances in the perinatal period.

Kristen Gulbransen, Kellie Thiessen, Grandmother Geraldine Shingoose, Heather Watson, Wanda Phillips-Beck, Patricia Gregory, and Javier Mignone

## METHODS

239 **Translation and Psychometric Evaluation of the Chinese Version of the Gynecological Cancers Awareness Scale**

The authors describe the translation, cultural adaptation, and psychometric evaluation of the Gynecological Cancers Awareness Scale.

Xiaojuan Tian, Lixiao Yang, Yan Liu, Linyao Feng, Run Wang, and Ying Li

## PRINCIPLES AND PRACTICE

249 **Protocol to Support Skin-to-Skin Care and Closeness Between Parents and Neonates in the NICU**

The protocol includes support for skin-to-skin care and closeness between parents and neonates for all neonatal patients in need of intensive care.

Victoria Karlsson, Pyrola Bäcke, Linda Björkman, Karin Holmgren, Lena Ingelsson, and Ylva Thernström Blomqvist
