EDITORIALS

473 **Reproductive Agency in an Era of Falling Fertility Rates**

JOGNN's Editor in Chief explores the global decline in fertility rates in the context of reproductive agency and considers implications of this trend for perinatal nurses and midwives.

Joyce K. Edmonds

477 **Expanding the Conceptualization of Bereavement in the Perinatal Period**

The authors propose the expansion of the concept of perinatal bereavement to include the effects of traumatic childbirth, mistreatment during childbirth, and maternal death.

Rana Limbo and Natasha Nurse-Clarke

COLUMN

STATISTICS IN NURSING RESEARCH

482 **Common Methodological Challenges in Health Care Quality and Improvement Studies and Related Solutions**

JOGNN's Assistant Editor, Statistics, describes key barriers to the successful implementation of quality improvement projects and presents potential solutions to avoid common pitfalls.

Oliwier Dziadkowiec

RESEARCH

488 **Secondary Qualitative Analysis of the Effect of Work-Related Stress on Women Who Experienced Miscarriage During the COVID-19 Pandemic**

Workplace policies, including flexible schedules, paid leave, and mental health resources, are essential to support women's unique needs after miscarriage, especially during crises.

Madeline Fernandez-Pineda, Elizabeth R. Black, and Alison Swift

501 **Effect of TeamBirth on Patient Trust and Autonomy During Childbirth in Oklahoma**

Experiencing a TeamBirth huddle during labor was associated with significantly higher levels of patient trust in the health care team and autonomy in decision-making during childbirth in Oklahoma.

Isabel Griffith, Vanessa Neergheen, Lynn El Chaer, Yara Altaher, Trisha Short, and Amber Weiseth

516 **Effects of Sociospatial Inequality on Exposure to Stress, Symptoms of Depression, and Cortisol Rhythms in Pregnancy**

Sociospatial deprivation was associated with greater exposure to stress, symptoms of depression, and altered cortisol rhythms in pregnancy after controlling for person-level characteristics.

Crystal Modde Epstein, Thomas P. McCoy, Angela M. Kabbe, and Kierra Sattler

530 **Discrimination and Regular Source of Care as Equity Factors Associated With Health and Stress During the Extended Postpartum Period**

Gender discrimination during the postpartum period was reported by about half of respondents and was modestly related to physical and mental health and stress measures.

Lorraine O. Walker, Nicole Murry, and Heather Becker

543 **Factors Associated With Gestational Weight Gain Among Nurses in Korea**

Age, fatigue, and occupational factors affected gestational weight gain among nurses in Korea.

Sook Jung Kang, Woon Young Hwang, Hyunju Dan, Sue Kim, and Kwang-Pil Ko

CASE REPORT

553 **Case Report of *Citrobacter koseri* Sepsis in a Newborn That Resulted in Brain Death**

Through examination of a rare *Citrobacter koseri* neonatal sepsis case, the authors highlight diagnostic challenges, neurotropic effects, and protocols to determine brain death.

Magdalena Panek, Aleksandra Warchol, Tomasz Tomasik, and Sandra Nęcka
