JOGNN.org

EDITORIALS

- 563 **Enhancing JOGNN's Online Presence for Better Access to Evidence**

The Editor in Chief addresses the transition to digital-only publication and describes upcoming enhancements to JOGNN's website.

Joyce K. Edmonds

- 566 **The Evolution of Grounded Theory**

JOGNN's Associate Editor describes the evolution of grounded theory methodologies, including first and second generation grounded theory approaches.

Cheryl Tatano Beck

COLUMNS

INTERPRETATIONS OF CURRENT MATERNAL AND NEONATAL RESEARCH TRIALS

- 571 **The REDUCED Trial: A Cluster Randomized Trial for REDucing the Utilization of Cesarean Delivery for Dystocia**

The author reviews a multicenter, cluster randomized controlled trial in 26 Canadian hospitals to assess whether adoption of new guidelines for diagnosing nonprogressing labor would reduce cesarean rates.

Ellise D. Adams

CURRENT EVIDENCE TO GUIDE PRACTICE, POLICY, AND RESEARCH

- 575 **Period Poverty Across the Life Course**

The author provides current evidence on period poverty across the life course.

Summer Sherburne Hawkins

POLICY REPORT

- 588 **Critical Juncture for Newborn Screening in the United States**

A key federal advisory committee critical to the work of the national newborn screening program has been eliminated, and what will replace it is unclear.

Mindy B. Tinkle

RESEARCH

- 595 **Human Factors Evaluation of the Use of Workarounds Among Obstetric Nurses**

Nurses innovate workarounds when technology, policies, and procedures do not support the necessary work pace to protect patient safety during emergencies.

Samantha L. Bernstein, Lisa-Marie O'Brien, and Chrissie Connors

- 606 **Patient Disability Status and the Use of Stigmatizing Language in Clinical Notes During Hospital Admission for Birth**

The birth hospitalization clinical notes of patients with disabilities were more likely to include stigmatizing language than the notes of patients without disabilities.

Sarah E. Harkins, Ismael I. Hulchafo, Jihye Kim Scroggins, Caroline Walsh, Meghan Didier, Maxim Topaz, and Veronica Barcelona

- 618 **Development and Evaluation of a Conceptual Framework for the Use of Fetal Myelomeningocele Repair**

The authors developed and evaluated a conceptual framework for the use of fetal myelomeningocele/myeloschisis repair based on Andersen's behavioral model of health service use.

Stephanie A. Eyerly-Webb, Amanda J. Nickel, Amy M. Linabery, Emily F. Barthel, Shukri Jumale, Jill Palmer, Melinda Stober, Nicholas Juckel, Ian Wolfe, Saul Snowise, Clifton O. Brock, and Stella K. Evans

HEALTH CARE IMPROVEMENT AND EVALUATION

- 633 **Implementation of Team Communication and Nurse Feedback to Reduce Cesarean Rates**

The use of an interprofessional communication tool before non-emergent cesarean and the examination of nurse-specific practices may reduce unnecessary cesareans and support physiological birth.

Jennifer L. Suess, Rhoda Vandyck, and Michelle Telfer

Continued

CASE REPORT

- 643 **Case Report of Piperacillin-Induced Toxic Epidermal Necrolysis During Pregnancy** e1

In cases of toxic epidermal necrolysis during pregnancy, it is essential to prevent and treat reproductive tract-related complications to minimize the effects on pregnancy and birth.

Dongqi Yang and Liping Zhou
