Association

GUEST EDITORIAL

611 Perinatal Palliative Care

The authors describe perinatal palliative care and the role nurses can play in the provision of this specialized and holistic health care.

Rana Limbo and Charlotte Wool

RESEARCH

614 Missed Opportunities for Postpartum Behavioral and Psychosocial Health Care and Acceptability of Screening Options

Women of diverse racial/ethnic and economic backgrounds overwhelmingly found screening for behavioral and psychosocial risks acceptable in health care settings.

Lorraine O. Walker, Christina L. Murphey, and Bo Xie

625 Health Care Use Outcomes of an Integrated Hospital-to-Home Mother-Preterm Infant Intervention

H-HOPE, an integrated mother-infant intervention, reduces acute care episodes (visits to the clinic/emergency department or hospital readmissions) for preterm infants.

Susan C. Vonderheid, Kristin Rankin, Kathleen Norr, Rohitkamar Vasa, Sharice Hill, and Rosemary White-Traut

639 Changes in the Immune Components of Preterm Human Milk and Associations With Maternal and Infant Characteristics

For women who gave birth preterm, levels of immune molecules in breastmilk decreased over time, and there were relationships among maternal and infant factors and immune components during the first 6 weeks after birth.

Maureen Groer, Terri Ashmeade, Allyson Duffy, Shannon Morse, and Judy Zaritt

649 Predictors of Breastfeeding Confidence in the Early Postpartum Period

The author identified factors associated with breastfeeding confidence, including birth satisfaction and preparation, partner support of breastfeeding, breastfeeding intention, and limiting in-hospital formula supplementation.

Katherine Hinic

661 Effect of Parent Presence During Multidisciplinary Rounds on NICU-Related Parental Stress

Providing parents with the opportunity to participate in multidisciplinary rounds did not affect NICU-related parental stress, and mothers reported higher levels of stress than fathers.

Kathryn W. Gustafson, Michelle A. LaBrecque, Dionne A. Graham, Nancy M. Tella, and Martha A. Q. Curley

671 The Experiences of Professionals Regarding Involvement of Parents in Neonatal Pain Management

Parents can assume the roles of preferred advocates for their infant and strong partners in managing painful procedures.

Katrin Marfurt-Russenberger, Anna Axelin, Annemarie Kesselring, Linda S. Franck, and Eva Cignacco

REVIEW

684 Integrative Review of Instruments to Measure Team Performance During Neonatal Resuscitation Simulations in the Birthing Room

The authors found that extant instruments rarely address the multiple factors that may impede interprofessional team performance in neonatal resuscitation in the birthing room.

Valerie Clary-Muronda and Charlene Pope

CASE REPORT

699 Case Report of Sepsis in Neonates Fed Expressed Mother's Milk

Mother's milk is recommended for premature infants, but expressed milk can harbor pathogenic bacteria from contaminated pumping equipment.

Sandra L. Smith and Laura Serke

EXPERT OPINION

706 National Partnership for Maternal Safety: Consensus Bundle on Venous Thromboembolism

Routine risk-based assessment and appropriate prophylaxis may reduce the risk of obstetric thromboembolism.

Mary E. D'Alton, Alexander M. Friedman, Richard M. Smiley, Douglas M. Montgomery, Michael J. Paidas, Robyn D'Oria, Jennifer L. Frost, Afshan B. Hameed, Deborah Karsnitz, Barbara S. Levy, and Steven L. Clark

AWHONN POSITION STATEMENTS

- 718 **Health Care Decision Making for Reproductive Care**
- 719 **Insurance Coverage for Contraceptives**

IN FOCUS EDITORIAL

- 721 **Parkinson's Disease and Women's Health**
The guest editor introduces the articles in the series.
Lisette Bunting-Perry

IN FOCUS CNE

- 723 **The Implications of Parkinson's Disease for Women's Health**
CNE The effects of Parkinson's disease on women's health are significant and wide ranging; the authors describe sex differences, clinical presentation, diagnosis, and treatment.
Ingrid Pretzer-Aboff, Lisette Bunting-Perry, and Meredith Spindler

IN FOCUS

- 737 **The Experience of Women Who Care for Spouses With Parkinson's Disease and Lower Urinary Tract Symptoms**
Patient- and family-centered interventions are warranted to address the needs of people with Parkinson's disease and associated lower urinary tract symptoms and the needs of their caregivers.
Helene Moriarty, Lisette Bunting-Perry, Joanne P. Robinson, and Christine W. Bradway
- 749 **Sex Differences in the Clinical Progression of Parkinson's Disease**
Although there are numerous, small, baseline clinical differences between men and women with Parkinson's disease, differences in markers of one-year progression are few.
Nabila Dahodwala, Qinglin Pei, and Peter Schmidt

ARTICLES ONLINE

RESEARCH

- e15 **Re-Evaluation of the Psychometric Properties of the Maternal-Fetal Attachment Scale in a Hungarian Sample**
The internal consistency of the Maternal-Fetal Attachment Scale was acceptable to measure overall maternal-fetal attachment in a Hungarian-speaking sample.
Andrea Andrek, Zoltan Kececs, Eva Hadhazi, Zack Boukydis, and Katalin Varga
- e26 **Reliability and Validity of the Reduced Spanish Version of the Iowa Infant Feeding Attitude Scale**
The Spanish Version of the Iowa Infant Feeding Attitude Scale (IIFAS) can be used to assess the attitudes of Spanish-speaking women about breastfeeding and is a good predictor of initiation, exclusiveness, and duration of breastfeeding.
Rosa Tomás-Almarcha, Antonio Oliver-Roig, and Miguel Richart-Martinez

PRINCIPLES & PRACTICE

- e41 **Standardized Discharge Information After Short-Stay Hysterectomy and Relationships With Self-Care Confidence, Perceived Recovery, and Satisfaction**
Providing quality discharge information to women undergoing short-stay hysterectomy promotes patient satisfaction, self-care confidence, and perceived recovery at home.
Kate M. Lynch and Sandra M. LeFort

IN FOCUS CNE POST TEST

- e55 **The Implications of Parkinson's Disease for Women's Health**
Ingrid Pretzer-Aboff, Lisette Bunting-Perry, and Meredith Spindler

SPECIAL REPORT

- e57 **Current Resources for Evidence-Based Practice, September/October 2016**
A review of new resources to support the provision of evidence-based care for women and infants.
Nicole S. Carlson
