EDITORIAL

161 Open Access and Predatory Publishing

The evolving world of publishing provides opportunity and potential peril.

Nancy K. Lowe

REVIEWS

163 Integrative Review of Factors and Interventions That Influence Early Father–Infant Bonding

The authors found three major themes related to early father–infant bonding and suggest the need for future initiatives.

Ashley Renee Scism and Robin Lynn Cobb

171 Integrative Review of Breastfeeding Duration and Influencing Factors Among Women Serving Active Duty in the U.S. Military

Military women experience barriers to breastfeeding, and attention should be given to develop policy, promote support, and provide education to facilitate lactation in their workplaces.

Andrea L. Farwell

RESEARCH

182 Feasibility and Potential Benefits of a Self-Monitoring Enhanced Lifestyle Intervention to Prevent Excessive Gestational Weight Gain in Women Who Are Overweight or Obese

A self-monitoring enhanced lifestyle intervention to prevent excessive gestational weight gain in women who are overweight and obese showed feasibility and potential benefits.

Carol Shieh, Ziyi Yang, David M. Haas, and Janet S. Carpenter

197 Depression Literacy and Awareness of Psychopathological Symptoms During the Perinatal Period

Women had moderate levels of depression literacy during the perinatal period, which may affect their emotional competence and consequently their ability to recognize the presence of psychopathological symptoms.

Ana Fonseca, Sheila Silva, and Maria Cristina Canavarro

209 Interconception Challenges of Women Who Had Prior Preterm Births

Women who had prior preterm births described mothering, self-care, finances, employment, partner relationships, individualized concerns, mental health, balance, physical health, housing, and family as challenges.

Doris M. Boutain, Shuyuann Wang Foreman, and Jane E. Hitti

220 A Randomized Controlled Trial of Glycerin Suppositories During Phototherapy in Premature Neonates

Findings did not support the routine use of glycerin suppositories among moderately premature neonates who receive phototherapy for management of hyperbilirubinemia.

Meggan Butler-O'Hara, Ann Reininger, Hongyue Wang, Sanjiv B. Amin, Nathan J. Rodgers, and Carl T. D'Angio

229 Effect of Prenatal Counseling on Breastfeeding Rates in Mothers of Twins

Antenatal breastfeeding counseling did not significantly improve breastfeeding rates in mothers of twins.

Fernanda Cristina Ferreira Mikami, Maria de Lourdes Brizot, Terezinha Hideco Tase, Elizabeth Saccuman, Rossana Pulcineli Vieira Francisco, and Marcelo Zugaib

238 Effects of Handling and Environment on Preterm Newborns Sleeping in Incubators

The environment and care provided for hospitalized preterm newborns did not influence sleep except for high light levels, which increased overall time of wakefulness.

Kelly Cristina Sbampato Calado Orsi, Marta José Avena, Marcia Lurdes de Cacia Pradella-Hallinan, Mavilde da Luz Gonçalves Pedreira, Miriam Harumi Tsunemi, Ariane Ferreira Machado Avelar, and Eliana Moreira Pinheiro

248 Experiences of Parish Nurses in Providing Diabetes Education and Preconception Counseling to Women With Diabetes

When parish nurses are provided with appropriate training and resources, they can improve preconception counseling for women with diabetes.

Jessica A. Devido, Willa M. Doswell, Betty J. Braxter, Diane L. Spatz, Janice S. Dorman, Martha Ann Terry, and Denise Charron-Prochownik

PRINCIPLES & PRACTICE

- 258 Lessons Learned From the Crisis in Flint, Michigan Regarding the Effects of Contaminated Water on Maternal and Child Health**

Because of aging water and pipeline infrastructure in the United States, maternal-child nurses should be prepared to effectively respond to community crises like the one experienced in Flint, MI.

Melva Gale Craft-Blacksheare

CONTEMPORARY PERSPECTIVES

- 267 Avoiding Chlorhexidine Burns in Preterm Infants**
The authors recommend safer use of chlorhexidine to prevent injury in newborns and to help health care professionals protect themselves against burn injury claims.

Mariano Paternoster, Massimo Niola, and Vincenzo Graziano

EXPERT OPINION

- 272 Consensus Bundle on Maternal Mental Health: Perinatal Depression and Anxiety**

The Council on Patient Safety in Women's Health Care provides broad direction for incorporating perinatal mood and anxiety disorder screening, intervention, referral, and follow-up into maternity care practice across health care settings.

Susan Kendig, John P. Keats, M. Camille Hoffman, Lisa B. Kay, Emily S. Miller, Tiffany A. Moore Simas, Ariela Frieder, Barbara Hackley, Pec Indman, Christena Raines, Kisha Semenuk, Katherine L. Wisner, and Lauren A. Lemieux

IN FOCUS EDITORIAL

- 282 The Importance of Informatics in Perinatal Nursing**
The Guest Editor describes how the articles in this series contribute to the knowledge base of informatics in perinatal nursing.

Catherine H. Ivory

IN FOCUS CNE

- 284 Standardizing Maternity Care Data to Improve Coordination of Care**

CNE

The authors describe the Maternal Health Information Initiative, a multidisciplinary group of maternity care stakeholders charged with standardizing maternity care data.

Catherine H. Ivory, Maria Freytsis, David C. Lagrew Jr., Dale Magee, Manuel Vallejo, and Steve Hasley

IN FOCUS

- 292 Social Determinants and Health Disparities Associated With Outcomes of Women of Childbearing Age Who Receive Public Health Nurse Home Visiting Services**

An informatics approach was used to discriminate between subgroups by minority and social and behavioral determinants subgroups and revealed hidden patterns in nursing interventions and outcomes.

Karen A. Monsen, Joan K. Brandt, Bonnie L. Brueshoff, Chih-Lin Chi, Michelle A. Mathiason, Sadie M. Swenson, and Diane R. Thorson

- 304 Addressing the Unique Needs of an Electronic Health Record in a Neonatal Intensive Care Unit**

For the implementation of an electronic health record to be successful, documentation must match workflow.

Carol Shade, Karen Kelly, and Karen Hofmann

- 310 Information Architecture for Perinatal Registration in the Netherlands**

Women's health care providers in the United States who are building perinatal registries and other data collection systems can benefit from insights gleaned from the Netherlands.

William T. F. Goossen and Anne Marieke Arns-Schiere

ARTICLES ONLINE
