## EDITORIAL

Women, Infants, and Opioids

## RESEARCH

Tailoring a NICU-Based Tobacco  
Treatment Program for Mothers Who Are  
Dependent on Opioids

Mentors Offering Maternal Support  
Reduces Prenatal, Pregnancy-Specific  
Anxiety in a Sample of Military Women

Effect of Oral Hydration on External  
Cephalic Version at Term

Antepartum Services and Symptoms of  
Postpartum Depression in At-Risk Women

Effect of Nonpharmacologic Pain Control  
During Examination for Retinopathy of  
Prematurity

Parents' Perspectives on Navigating the  
Work of Speaking Up in the NICU

End-of-Life Decision Making for Parents of  
Extremely Preterm Infants

Parents' Perspectives of Closeness and  
Separation With Their Preterm Infants in  
the NICU

Administration of Fortifier by Finger  
Feeder During Breastfeeding in Preterm  
Infants

Retrospective Evaluation of the  
Procedural Sedation Practices of Expert  
Nurses During Abortion Care

## REVIEW

Systematic Review of Immigrant Women's  
Experiences With Perinatal Care in North  
America

## EXPERT OPINION

Consensus Bundle on Severe  
Hypertension During Pregnancy and  
the Postpartum Period

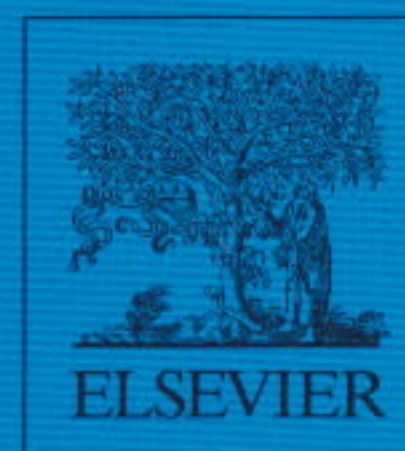

## SPECIAL REPORT

Current Resources for Evidence-Based  
Practice, September/October 2017

## AWHONN POSITION STATEMENTS

Tobacco Use and Women's Health

Breast Cancer Screening

## EDITORIAL

### 657 Women, Infants, and Opioids

The United States is in the grip of an epidemic of opioid addiction that threatens the health of women and infants.

*Nancy K. Lowe*

## RESEARCH

### 660 Tailoring a NICU-Based Tobacco Treatment Program for Mothers Who Are Dependent on Opioids

Comprehensive tobacco treatment programs in the NICU have potential to promote tobacco cessation among women with opioid dependence disorders.

*Amanda Fallin-Bennett and Kristin Ashford*

### 669 Mentors Offering Maternal Support Reduces Prenatal, Pregnancy-Specific Anxiety in a Sample of Military Women

Participation in the MOMS program reduced pregnancy-specific anxiety related to maternal role identification and labor preparation.

*Karen L. Weis, Regina P. Lederman, Katherine C. Walker, and Wenyaw Chan*

### 686 Effect of Oral Hydration on External Cephalic Version at Term

Oral hydration increased amniotic fluid volume but was not associated with an increased success rate of external cephalic version.

*Virna Franca Zobbi, Antonella Nespoli, Elisa Spreafico, Roberta Recalcati, Federica Loi, Antonietta Scian, and Stefania Galimberti*

### 696 Antepartum Services and Symptoms of Postpartum Depression in At-Risk Women

Expanded psychosocial risk screening during pregnancy that is linked to preventive services, such as home visiting, may decrease the odds of at-risk women developing postpartum depression.

*Sharon L. Ruyak, Angelina Flores-Montoya, and Blake Boursaw*

### 709 Effect of Nonpharmacologic Pain Control During Examination for Retinopathy of Prematurity

Swaddling with oral administration of sucrose or breast milk was no more effective than swaddling with distilled water to reduce pain in premature infants during examinations for retinopathy of prematurity.

*Gülümser Dolgun and Şirin Bozlak*

### 716 Parents' Perspectives on Navigating the Work of Speaking Up in the NICU

Clinicians need to recognize complex factors that influence parents' perceptions of safety and their willingness to speak up about safety concerns in the NICU.

*Audrey Lyndon, Kirsten Wisner, Carrie Holschuh, Kelly M. Fagan, and Linda S. Franck*

### 727 End-of-Life Decision Making for Parents of Extremely Preterm Infants

Results suggest the need for careful evaluation of parents' wishes about involvement in decision making for extremely premature infants. Without genuine dialogue, paternalistic decision trajectories are reproduced.

*Manya J. Hendriks and Andrea Abraham*

### 737 Parents' Perspectives of Closeness and Separation With Their Preterm Infants in the NICU

Parents felt close to their preterm infants when they were involved in care as much as possible.

*Stephanie C. Treherne, Nancy Feeley, Lyne Charbonneau, and Anna Axelin*

### 748 Administration of Fortifier by Finger Feeder During Breastfeeding in Preterm Infants

Administration of fortifier with a finger feeder for preterm infants enabled mothers to exclusively breastfeed their infants and was well tolerated by most infants.

*Margarita Thanhaeuser, Alexandra Kreissl, Claudia Lindtner, Sophia Brandstetter, Angelika Berger, and Nadja Haiden*

**755 Retrospective Evaluation of the Procedural Sedation Practices of Expert Nurses During Abortion Care**

Procedural sedation administered by expert registered nurses is useful to manage the pain associated with abortion procedures.

*Monica R. McLemore and E. Angel Aztlan*

**REVIEW**

**764 Systematic Review of Immigrant Women's Experiences With Perinatal Care in North America**

Health care providers can positively influence the care of pregnant immigrant women through reciprocal communication, explanation of practice, and facilitation of supportive connections.

*Anika Winn, Erin Hetherington, and Suzanne Tough*

**EXPERT OPINION**

**776 Consensus Bundle on Severe Hypertension During Pregnancy and the Postpartum Period**

Severe maternal morbidity from hypertension may be prevented through the implementation of a bundle of evidence-based, straightforward actions.

*Peter S. Bernstein, James N. Martin Jr., John R. Barton, Laurence E. Shields, Maurice L. Druzin, Barbara M. Scavone, Jennifer Frost, Christine H. Morton, Catherine Ruhl, Joan Slager, Eleni Z. Tsigas, Sara Jaffer, and M. Kathryn Menard*

**SPECIAL REPORT**

**788 Current Resources for Evidence-Based Practice, September/October 2017**

A review of new resources to support the provision of evidence-based care for women and infants.

*Nicole S. Carlson*

**AWHONN POSITION STATEMENTS**

**794 Tobacco Use and Women's Health**

**797 Breast Cancer Screening**
