Childbearing Families, & Newborns*

EDITORIAL

Racism, Nursing, and Strategies for Change

LETTER TO THE EDITOR

On "Parents' Experiences With a Model of Integrated Maternity and Neonatal Care Designed to Empower Parents"

CRITICAL COMMENTARIES

Fifty Years of the Rise in Cesarean Birth in the United States and Opportunities for Improvement

Perinatal Behavioral Health, the COVID-19 Pandemic, and a Social Determinants of Health Framework

REVIEWS

Integrated Review of the Assessment of Newborns With Neonatal Abstinence Syndrome

Critical Interpretive Synthesis of Qualitative Data on the Health Care Ecosystem for Vulnerable Newborns in Low- to Middle-Income Countries

RESEARCH

Experiences of Nurses Who Support Parents During Perinatal Death

Association Between Breastfeeding Discouragement and Breastfeeding Behaviors

Breastfeeding Outcomes, Self-Efficacy, and Satisfaction Among Low-Income Women With Late-Preterm, Early-Term, and Full-Term Infants

Views on Exercise Among Black Women During Pregnancy

Factors That Influence Women's Symptoms of Postpartum Depression After Discharge of Their Preterm Infants From the NICU

HEALTH CARE IMPROVEMENT AND EVALUATION

Implementing a Maternal Rest Bundle to Prevent Newborn Falls

METHODS

Method to Calculate Nurse-Specific Cesarean Rates for the First and Second Stages of Labor

SPECIAL REPORT

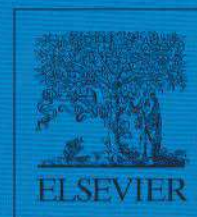

Current Resources for Evidence-Based Practice, September 2021

AWHONN POSITION STATEMENTS

Breastfeeding and the Use of Human Milk
Racism and Bias in Maternity Care Settings

ONLINE SUPPLEMENT

The Use of Human Milk During Parent-Newborn Separation

EDITORIAL

507 Racism, Nursing, and Strategies for Change

In this guest editorial, Dr. Barbara Broome shares her personal experiences and suggests strategies to address racism in the field of nursing.

Barbara Broome

LETTER TO THE EDITOR

512 On "Parents' Experiences With a Model of Integrated Maternity and Neonatal Care Designed to Empower Parents"

The idea of intervening with the family as a whole using an integrated model of care is an important goal for practice and future research.

Fernanda Loureiro and Paula Oliveira

CRITICAL COMMENTARIES

515 Fifty Years of the Rise in Cesarean Birth in the United States and Opportunities for Improvement

The rate of cesarean birth remains increased because technologically assisted birth is the health care norm in most of the United States.

Melissa McIntire Sherrod

525 Perinatal Behavioral Health, the COVID-19 Pandemic, and a Social Determinants of Health Framework

Nurses are positioned to advocate for the integration of psychosocial screening with a social determinants of health framework into perinatal care.

Sharon L. Ruyak and Katie T. Kivlighan

REVIEWS

539 Integrated Review of the Assessment of Newborns With Neonatal Abstinence Syndrome

Neonatal abstinence syndrome has a negative effect on newborns. There are many methods to reduce symptoms, use of medication, and length of stay.

Sharon G. Casavant, Taylor Meegan, Mollie Fleming, Naveed Hussain, Semih Gork, and Xiaomei Cong

549 Critical Interpretive Synthesis of Qualitative Data on the Health Care Ecosystem for Vulnerable Newborns in Low- to Middle-Income Countries

Focusing attention on support for the caregiver-parent interaction can help identify and prioritize factors for mitigating the effects of pervasive turbulence and tension in the setting.

Hannah Ray, Kathleen L. Sobiech, Maria Alexandrova, Julia Jerono Songok, Janet Rukunga, and Sherri Bucher

RESEARCH

561 Experiences of Nurses Who Support Parents During Perinatal Death

Unrealistic self-expectations, self-denial, and negative self-awareness led to emotional fragility, which made it difficult for participants to intervene.

Chantal Verdon and Francine deMontigny

568 Association Between Breastfeeding Discouragement and Breastfeeding Behaviors

Findings indicated that breastfeeding discouragement from others did not negatively affect the initiation and was not associated with the discontinuation of breastfeeding.

Camille A. Fabyi, Kristin Rankin, and Arden Handler

583 Breastfeeding Outcomes, Self-Efficacy, and Satisfaction Among Low-Income Women With Late-Preterm, Early-Term, and Full-Term Infants

Suboptimal breastfeeding, lower breastfeeding self-efficacy, and lower breastfeeding satisfaction persisted among low-income women with late-preterm and early-term infants compared to those with full-term infants.

Azza H. Ahmed and Wilaiporn Rojjanasrirat

597 Views on Exercise Among Black Women During Pregnancy

Clinicians should provide education about exercise, help women overcome barriers, recommend exercise partners, and refer women to exercise programs to support adequate exercise during pregnancy.

Jean W. Davis, Lindsey McCracken, Relicious N. Eboh, Mercedes Price, Lauren Lebo, Dawn Misra, Karen Kavanaugh, JoEllen Wilbur, and Carmen Giurgescu

610 Factors That Influence Women's Symptoms of Postpartum Depression After Discharge of Their Preterm Infants From the NICU

Perception of child vulnerability and stress predicted symptoms of postpartum depression in women who gave birth to preterm infants; whereas resourcefulness did not.

Christine Grippi

**HEALTH CARE IMPROVEMENT
AND EVALUATION**

621 Implementing a Maternal Rest Bundle to Prevent Newborn Falls

Newborn falls in the hospital can be eliminated by using a structured quality improvement process and a multidisciplinary team approach to implement a maternal rest bundle.

Kenisha Karlsson, Julie Makatura, and David Mulkey

METHODS

632 Method to Calculate Nurse-Specific Cesarean Rates for the First and Second Stages of Labor

Nurse-specific cesarean birth rates by stage of labor can be calculated from existing medical record information, and these rates vary widely across nurses.

*Naomi Greene, Jolene Kilcoyne, Adam Grey,
and Kimberly D. Gregory*

SPECIAL REPORT

642 Current Resources for Evidence-Based Practice, September 2021

A review of new resources to support the provision of evidence-based care for women and infants.

Marit L. Bovbjerg
